

2020 OISCA Annual Report

Highlight:

Our response to Corona Virus Pandemic

In the months since millions of people were advised/ordered to stay at home, we reached out to quarantined communities.

- Our training centers, mostly located in rural areas became focal points that provided hopes to locals suffering from food and water.
- Our OISCA graduates and the members of our national and local chapters and mobilized resources and networks to conduct awareness campaigns on how to stay safe during the crisis, and distributed handmade facemasks, hand sanitizers, and food supplies.

Thailand

OISCA Reforestation Project in Surin, Thailand won the National Forest Contest and is recognized by the government as the best across the country.

Mongolia

Four OISCA training graduates were awarded with the Excellence Award in the field of natural environment by the Mongolian government.

Japan

Mt. Fuji Reforestation Project received the Environmental Award from the Japanese Government

International Cooperation Projects

駐在員・現地スタッフ300名を中心に
開発協力の現場でSDGsを推進

Sericulture technical training in Japan for Philipino (Nagano, Japan)

Environmental restoration for next generation

Foot of Mt. Rau, Java, Indonesia
ジャワ島ラウ山麓における生物多様性機能再生及び担い手づくりPT

Collaboration between forest conservation and improvement livelihood

Peony re-plantation and livelihood project, Burugan, Mongolia
ジャワ島ラウ山麓における生物多様性機能再生及び担い手づくりPT

Tree Planting: 10 countries, 300 ha
(April, 2019- March, 2020)

SDGs 推進に向け意識と実践力を育む
84校が新規参加

Total **5,264 schools** in **36 countries**

Contribution to the seeds bank for biodiversity

Children are collecting seeds of indigenous plant, India

Learning the link with Nature

Environmental Education : Eco seminar at their forest, Myanmar

5カ国288名の技能実習生を受け入れ
14の国と地域から36名の研修生、

36 trainees from 14 countries
288 technical trainees from 5 countries
(April, 2019- March, 2020)

Technical Intern Training (care)

FY 2019, OISCA Japan started coordinating technical intern training

Training in the Chubu TC

In addition to the agricultural training, trainees participate youth seminars and field works

海外ボランティアや体験活動など
参加型の啓発活動を推進

Eco-DRR Seminar

OISCA Japan held many seminar relating Ecosystem-based Disaster Risk Reduction

Commemorative tree planting at Mt. Fuji

commemorate the 150th Birth Anniversary of Mahatma Gandhi

13 Chapters and 41 promotion organizations

Coastal Forest Restoration Project in Tohoku

OISCA HQ
Japan

2011-2020

□ One of our flagship projects that catalyzed the revitalization of the area damaged by the March 11, 2011 earthquake and tsunami in Japan.

With 98% survival rate, the 5-km long and 0.20-km wide 100 hectares reforestation project now serves as protective barrier from wind-blown sand, salt spray, and strong winds.

Ten-Year(2021-2030) Perspective on EBS and BBS

Eco-System Based Solutions (EBS) and Business Based Solutions (BBS)

Eco-System Based Solutions(EBS)

Approaches in dealing with social issues making the best use of natural agency and the forces of nature

Activities

- 1. Reforestation based on Eco-DRR concept**
- 2. Promotion of sustainable agricultural development, capacity building, and the Children's Forest Program (CFP)**

Goals:

- 1. Primary and other industries development by making the best use of resources from Nature**
 - 2. Rehabilitation and conservation of rich Nature**
 - 3. Education and training to enhance the awareness to protect and foster Nature**
- * Quantitative indicators of goals above will be informed soon.**

Ten-Year(2021-2030) Perspective on EBS and BBS

Eco-System Based Solutions (EBS) and Business Based Solutions (BBS)

Business Based Solution (BBS)

Solutions to social issues by going into partnership with business sector and carrying on social businesses

Activities:

- 1. Promoting the Technical Intern Training Program (TITP), directly engage in the training or partner with other agencies in achieving the purposes**
- 2. Providing consultation services for businesses overseas (such as organizing business matching forums)**
- 3. Initiating and promoting social businesses**

• Goals:

- 1. Education and training of young business leaders to work for a sustainable future in a spirit of altruism and empathy**
 - 2. To create a society where people co-work in a spirit of cooperation,**
 - 3. To overcome the barriers of national boundaries, religions, ethnicities, etc.**
- * Quantitative indicators of goals above will be informed soon.**

Aiming for a Sustainable Worldview

Realization of a sustainable society where all people overcome differences, coexist, and live in harmony with nature

Resonance with SDGs

Outcomes to be achieved

- Promotion of industries that utilize the power of nature.
- Revival of abundant nature that is the foundation of a sustainable society
- Fostering people who protect and nurture nature

- Fostering industrial human resources with altruism to build a sustainable society.
- Realization of a society that helps each other overcoming differences in country, religion, and race

Approach (Method)

Ecosystem-Based Solution
Solving social issues by utilizing the power of nature

Business-Based Solution
Solving social issues through contributions to the business field

Activities

Sustainable agriculture promotion & training business

Reforestation activities

Children's Forest Program

Technical intern training / mediation

Overseas business consulting

Social Business

* In every outcome to be achieved and its corresponding activities, write the goals and indicators (in numbers), which to be achieved in 10 years. There are different projects in every activity, and if every project has set goals and achievements, the targeted sustainable worldview will be realized.

Summary

The Sustainable Development Goals (SDGs) concern a wide range of targets, including poverty alleviation, economic growth, and environmental conservation.

Our collective efforts, especially at the local level are crucial in the realization of these targets.
